Abstract

Everything is connected and everyone is vulnerable. Cybersecurity affects individuals, companies and nations. Based on case studies and hands-on experience, the presenter intends bringing us closer to the crime scenes by examining the tools, techniques and procedures (TTPs) used by top cyber attackers and those used by the top cyber defenders.

Biography

Freeman Ng is the Principal Consultant of iSystems Security Limited with 30 years of IT experience. He provides information security services to financial institutions and multinational corporations in Hong Kong, Macau, and China. Prior to the current position, Freeman has hands-on IT technical and risk management experience in world-class banking, financial institutions and multinational corporations, including Standard Chartered Bank, Unisys and NEC.

Mr. Ng is actively involved in cybersecurity research, practice and training for the last 10 years. He has successfully completed numerous cybersecurity projects for leading banking, financial institutions and multinationals in the Asia Pacific Region. Mr. Ng is accredited CISA and CISM trainer. He delivers hands-on workshops on Cybersecurity and Hi-tech Crimes Investigation.
