Registration:	ISACA China HK Chapter Members: Online Registration For Member of ACFE HK/ HKCS/ HKICPA/ CPA Canada/ IIA HK and Non-Member: Please complete the reservation reply and return to events@isaca.org.hk .

Abstract

The world is increasingly digital, with mobile devices, IoT, cloud services, blockchain and FinTech. But as the data volumes grow, and our dependence on the digital world increases, the threats to information security are also increasing, and regulators are placing more stringent compliance requirements on companies (e.g. GDPR and other privacy laws). Data breaches are increasing and of increasing impact. Security solutions need to be up to the challenge. Hardened security, using Hardware Security Modules (HSM) is vital to protect important data, on-premise and in the cloud. Software-only solutions cannot match the levels of assurance that hardware can provide.

Biography

Ian Christofis is Managing Principal Consultant with nCipher Security, an Entrust Datacard company, driving solution-focused professional services in Asia-Pacific (APAC).

He is a specialist in information security, applied cryptography, and personal data privacy. He combines a strong understanding of the commercial and strategic business issues with a detailed knowledge of the technology. He has over 30 years' experience providing consultancy, guiding businesses, and providing thought-leadership across a range of industries, including the banking & financial sector, eCommerce, manufacturing, and government.

Ian is a frequent public speaker, and has been interviewed for print media, radio and television.
