Abstract

When your company is plugged into the world, it's easy to forget the world is also plugged into your company. Protecting your assets and those of your clients from a growing range of security threats is a challenging responsibility. Most people ignore the seriousness of hackers, malware, undesirable content, spammers and data leaks, until it's too late. Even one successful cyber attack can devastate an organization.

In this seminar, Michael will share with you, the latest security threat landscape, and **10 essential cyber security facts that you need to know**, in order to protect network and digital assets.

Biography

Michael Gazeley is the Managing Director and Co-founder of Network Box Corporation Limited.

Founded nearly two decades ago, Network Box is one of the world's leading Managed Security Service Providers (MSSPs). Network Box's dedication to developing new and cutting-edge security technologies has enable the company to win more than 140 national and international awards across the globe, including two Grand and eight Gold awards published in Silicon Valley. The company has also been recognised and listed by independent security researchers and analysts including *Gartner*, *Forrester*, and *Frost & Sullivan*.

Network Box's Security Operations Centre (SOC), is triple ISO certified (ISO 9001, ISO 20000, ISO 27001), by SGS of Switzerland, and is the only MSSP in Hong Kong that is a Microsoft Active Protections Program (MAPP) partner. In addition, Network Box protects many of the world's best-known companies and organizations, governmental departments and financial institutions. In the USA alone, Network Box protects more than 150 banks and credit unions.

With nearly three decades of experience in the Information Technology field, Michael was recognised by the world-renowned ISC[2] (International Information Systems Security Certification Consortium), which honoured him with its first Asia-Pacific Information Security Leadership Achievement Award in 2007.
